Salka, O.kars.
CALCULATION OF IMPULSE-CIRCUITS. [1962] 1 p.
(figs., formulae tables refs. omitted)
Available on loan from SLA

Trans. of Archiv fur Elektrotechnik (Germany) 1953,
v. 41 [no. 1] p. 15-27.

DESCRIPTORS: *Circuits, *Wiring diagrams,
Mathematical analysis, Voltage.

There is shown a way for the joint calculation of a periodical impulse waves which are produced by a CLR circuit or a combined CR circuit (without L). The clarity therein is achieved by the introduction of a new coefficient of the aperiodicity. For those analytical functions whose numerical evaluation can only be carried out in a time-consuming manner or not directly, there have been constructed auxiliary curves. Finally, the calculating procedure is illustrated with the help of some practical examples. (Author)
